

# Assignment 1: Color Quiz

We've created a simple number quiz game in the first class. This lab is to help you review some of the concepts we covered in that class.

<ScreenShots>

## Requirements

- Your app has to show two color widgets so that user can select the right answer.
- Your app has to have 3 textViews which represent score, question label and color label to indicate what color user has to choose.
- Your app needs to update the score label. Increment 1 for a right answer. Decrement 1 for a wrong answer.
- Your app needs to show a toast after each question to indicate the answer is wrong or right.
- Your app has to have at least 10 different questions randomly chosen.
- You have to create an appropriate model class to represent a question.
